

Riyadh Metro System

World-class transportation project revolutionizing Saudi Arabia's capital city. Spanning 176.5 kilometers with 85 stations across 6 lines, it represents the kingdom's largest transit development ever undertaken.

Project Overview

Royal Initiative

Launched by the Royal Commission for Riyadh City (RCRC) to modernize urban mobility.

Solving Congestion

Addresses critical transportation needs in a city where 90% of trips were by private vehicle.

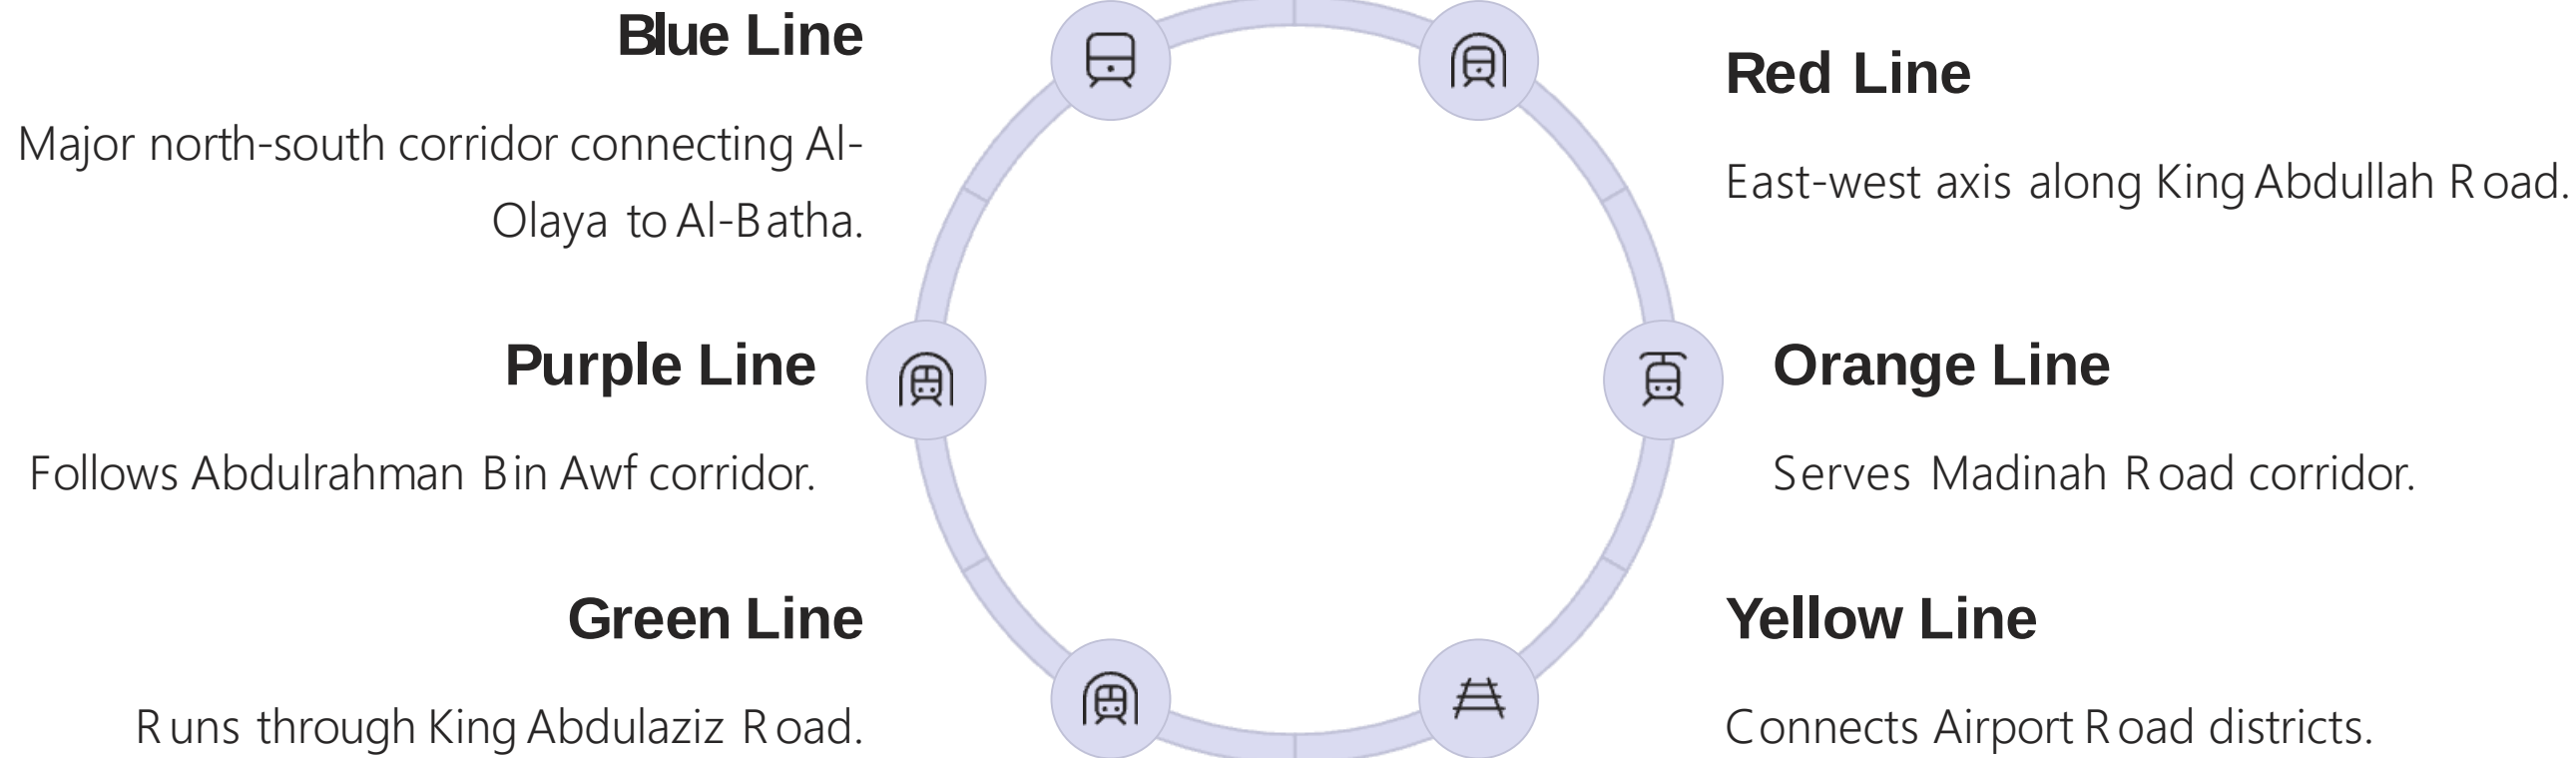

Urban Transformation

Creates sustainable transit infrastructure for Riyadh's growing population and economy.

Network and Lines

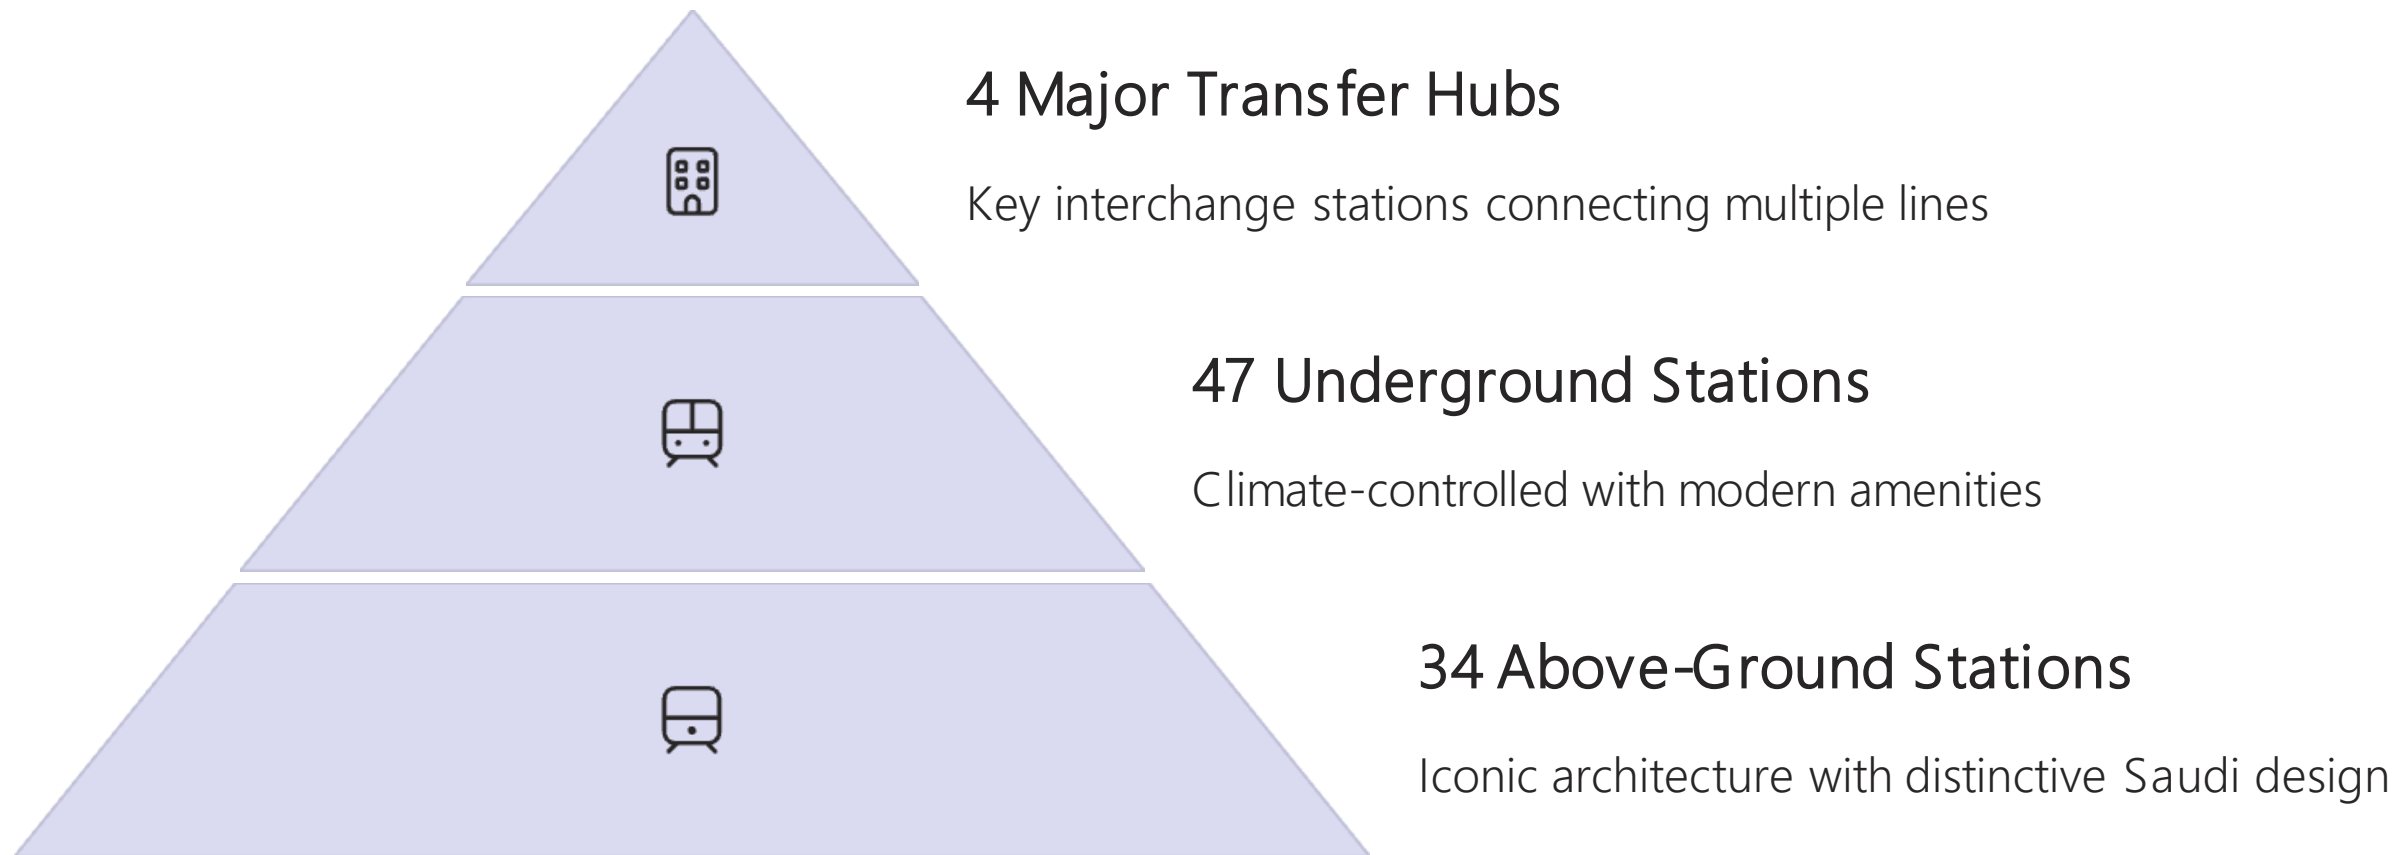

Metro Lines In Detail

Line	Length	Main Route
Blue	38 km (17.3 underground)	Al-Olaya to Al-Batha
Red	25.3 km	King Abdullah Road
Orange	40.7 km	Madinah Road
Yellow	29.5 km	Airport Road
Green	12.9 km	King Abdulaziz Road
Purple	29.7 km	Abdulrahman Bin Awf

Stations and Main Hubs

Technological Features

Advanced Train Systems

Latest signaling technology ensures safe, efficient operations with minimal headways between trains.

Passenger Comfort

Powerful air conditioning systems maintain pleasant temperatures despite harsh desert climate.

Smart Connectivity

Wi-Fi enabled stations and trains keep passengers connected throughout their journey.

Real-Time Information

Digital displays provide instant updates on train arrivals, departures and network status.

Capacity and Operations

3.6M

Daily Riders

Maximum daily passenger capacity
across all lines

2024

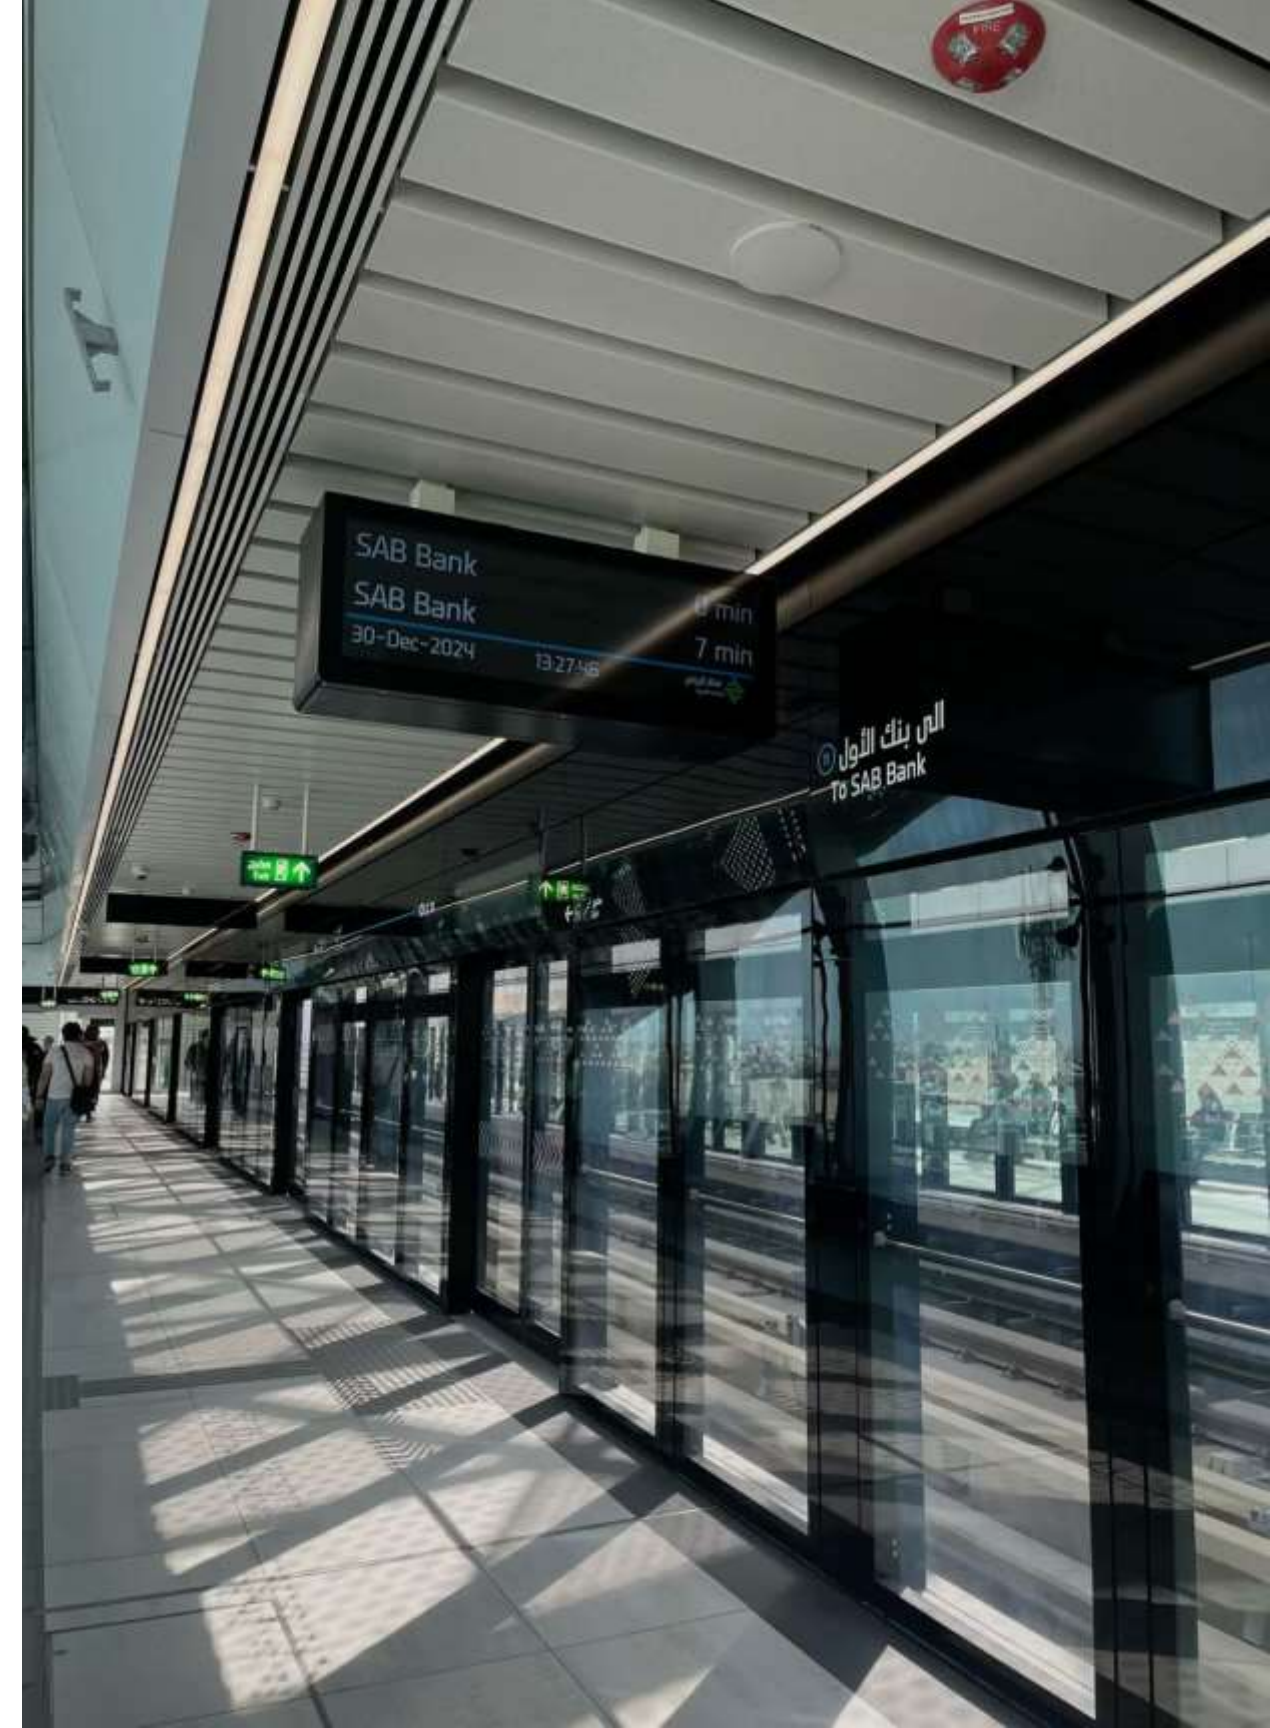

Opening Date

Blue Line scheduled to begin
service in December

85

Total Stations

Access points throughout the
sprawling metropolitan area

Impact on Riyadh

Traffic Relief

Dramatically reduces congestion on main arteries

Environmental Benefits

Improves air quality by reducing private vehicle use

Economic Growth

Enhances access to jobs, education and business opportunities

Future Vision

Public Transit Culture

Establishing new mobility patterns in a car-centered society. The metro creates sustainable transit habits for generations.

Regional Hub

Positioning Riyadh as a model for integrated urban transportation. The system connects to future regional transit networks.

Saudi Model

Setting standards for future transit projects across the Kingdom. Knowledge transfer benefits upcoming developments nationwide.
